

METHOD, SYSTEM, AND ARTICLE FOR PLACING A TELEPHONE
CALL TO A PREVIOUSLY-CALLED PARTY

Abstract of the Disclosure

5

Upon receiving a service code from a calling party, a list of parties previously called by the calling party is retrieved. An audio message is generated based on the list, and communicated to the
10 calling party. A dialed input indicating a selected party from the list is received from the calling party. Based on the dialed input, a call between the calling party and the selected party is initiated.
